

CLAIMS

I claim:

1. A modified fitted sheet adapted to cover a conventional mattress having four corners, said modified fitted sheet comprising:

a flat panel having at least one end panel and one side panel depending therefrom, said side panel and said end panel being continuous and intersecting at a corner;

a hem disposed at said corner, said hem having elastic material therein whereby said corner forms a pocket for accommodating one corner of the mattress; and

means attached to said hem for enlarging said pocket.

2. A modified fitted sheet as recited in claim 1, wherein said means for enlarging includes a flat triangular-shaped panel having three sides.

3. A modified fitted sheet as recited in claim 2, wherein two of said three sides are attached to said hem.

4. A modified fitted sheet as recited in claim 2, wherein said flat triangular-shaped panel is fabricated from cloth.

5. A modified fitted sheet adapted to cover a conventional mattress having four corners, said modified fitted sheet comprising:

a flat panel having at least one end panel and one side panel depending therefrom, said side panel and said end panel being continuous and intersecting at a corner;

a hem disposed at said corner, said hem having elastic material therein whereby said corner forms a pocket for accommodating one corner of the mattress; and

a triangular-shaped panel member having three sides, said triangular-shaped panel member being fabricated from cloth and wherein two of said three sides are attached to said hem for enlarging said pocket.

6. A modified fitted sheet as recited in claim 5, wherein said fitted sheet includes two side panels and two end panels whereby four corners are formed each corner including a hem having elastic material therein; and a triangular-shaped panel member disposed at each of said four corners.
